

ELEC390 Lab Exercise Week 1 Part 1

Design Improvement

Mode: Complete in a group of 3 students

Task: Identify an existing product or system (that at least two of you are familiar with) which you feel has an obvious design flaw or unresolved design issue. In your group, brainstorm solutions to the problem, and come up with a suggested design improvement and comment on possible cost/feasibility/complexity. If you've found it on the web, provide a link. Submit online (one submission per group).

The Product or System:

Its Design Flaw or Unresolved Issue (include a sketch to help explain):

Your Proposed Design Improvement (include a sketch to help explain):
